Ministry of Energy and Mineral Resources Supports Gas Indonesia Summit

Dear Colleagues Active in the Energy Industry,

The Ministry of Energy and Mineral Resources (ESDM) are fully supporting the development and execution of Gas Indonesia Summit and Exhibition (GIS) 2019 and encourage colleagues active in Indonesia's energy industry to join us in supporting GIS 2019.

Taking place at the Jakarta Convention Centre (JCC) between **31st July – 2nd August 2019**, GIS will bring together the complete energy value chain from exploration and production, through processing and refining, to marketing and distribution.

Thoughtfully developed under the theme **Indonesia's Largest Fullstream Natural Gas and LNG Event**, Gas Indonesia Summit and Exhibition 2019 is set to connect Indonesia's oil and gas community over three days of strategic and technical conference content, and its business-driven trade exhibition convening 500+ conference delegates, 80+ expert speakers, 80+ exhibiting companies and 6,000+ industry attendees.

ESDM will be supporting GIS 2019 by attending the conference and exhibition, contributing speakers to the programme, profiling our organisation in the exhibition and promoting the event to our industry network.

We encourage you to make time to discuss with our partners at dmgs events, the organisers of Gas Indonesia Summit 2019, to explore how you can participate in this important platform and together accelerate the development of Indonesia's natural gas and LNG industry through open dialogue and information exchange.

We look forward to seeing you in Jakarta later this year to continue this conversation!

Djoko Siswanto
Director General Oil & Gas
Ministry of Energy and Mineral Resources
