

Subject: SKK Migas Supports Gas Indonesia Summit

Dear Colleagues Active in the Energy Industry,

SKK Migas fully supports the development and execution of Gas Indonesia Summit and Exhibition and encourage colleagues active in Indonesia's energy industry to join us in supporting the next edition of Gas Indonesia Summit.

Taking place at Pullman Jakarta Central Park from 23 to 24 June 2021, the Gas Indonesia Summit will bring together the complete energy value chain from exploration and production, through processing and refining, to marketing and distribution.

Thoughtfully developed under the theme Indonesia's Largest Fullstream Natural Gas and LNG Event, Gas Indonesia Summit and Exhibition is set to connect Indonesia's oil and gas community over two days of strategic and technical conference content, and its business-driven trade exhibition convening 6,000+ attendees, 500+ conference delegates, 80+ speakers and 100+ exhibiting companies.

SKK Migas will be supporting the Gas Indonesia Summit by attending the conference and exhibition, contributing speakers to the programme, profiling our organisation in the exhibition and promoting the event to our industry network.

We encourage you to make time to discuss with our partners at dmgevents, the organisers of Gas Indonesia Summit, to explore how you can participate in this important platform and together accelerate the development of Indonesia's natural gas and LNG industry through open dialogue and information exchange.

We look forward to seeing you in Jakarta to continue this conversation!

Murdo Gantaro
SKK Migas
